Projects

ServeDesk – Home Service Booking Platform	May 2026 - Jul 2026
- Developed a responsive frontend for a home service booking platform connecting clients with service providers for services such as house cleaning, AC repair, plumbing, electrical work, painting, and appliance repair. - Designed and implemented role-based user interfaces for both clients and providers, including user registration, login, dashboards, and profile management. - Built interactive features such as service provider search and filtering, appointment booking, booking status tracking (Pending, Accepted, Completed, Rejected, and Cancelled), and customer review and rating functionality. - Integrated frontend components with backend REST APIs to provide a seamless, responsive, and user-friendly experience across desktop and mobile devices. - Repository: https://github.com/techaadrsh/ServiceDesk.git	
Smart Stay System(Airbnb) Responsive Web Design	Feb 2026 - Apr 2026
- Developed a full-stack Airbnb-inspired web application using MongoDB, Express.js, and Node.js with JWT-based authentication and role-based user access. - Implemented property listings, image uploads, reservations, booking management, user authentication, and profile management. - Designed and integrated RESTful APIs, performed CRUD operations, and managed MongoDB databases for efficient data storage and retrieval. - Built a responsive and user-friendly interface, ensuring seamless navigation and an optimized user experience across different devices. - Repository: https://github.com/techaadrsh/forum-website.git	
E-Voting System (Team Project) HTML5, CSS3, JavaScript, Bootstrap 5, MySQL	Nov 2025 - Jan 2026
- Collaborated with a team to develop a responsive web-based home service booking platform connecting clients with service providers. - Designed and implemented the frontend using HTML5, CSS3, JavaScript, and Bootstrap 5. - Developed responsive pages for client and provider registration, login, role-based dashboards, provider listings, appointment booking, and booking management. - Implemented service search and filtering by trade and availability, along with booking status tracking and customer review functionality. - Integrated frontend components with backend REST APIs to ensure seamless communication between the user interface and server. - Optimized the user interface for responsiveness, usability, and cross-browser compatibility across desktop and mobile devices.	

Certificates

Advance Backend Development with Node.js, Express and MongoDB	Jun 2026 - Jul 2026
<i>PW Skill</i>	
DSA with c++	Dec 2025 - Apr 2026
<i>Apna College</i>	
C++	Aug 2025 - Nov 2025
<i>Great Learning</i>	

Skills

Languages: C, C++, Java, JavaScript, MongoDB, SQL

Technologies/Frameworks: Node JS, Express JS, Bootstrap, Git, GitHub

Domain Skills: Data Structures and Algorithms, Responsive Web Design, JavaScript

Soft Skills: Communication Skills, Problem-Solving & Critical Thinking, Analytical & Logical Thinking

Education

Lovely Professional University	2025 - Present
<i>Master of Computer Applications - CGPA : 7.92</i>	
Maa Gayatri Degree College	2022 - 2025
<i>Bachelor of Computer Applications - CGPA : 7.6</i>	
PT.J.S.D College	2021 - 2022
<i>Higher Secondary Education (PCM) - Percentage : 68.6</i>	
A.A.K.S.S	2019 - 2020
<i>Secondary Education - Percentage : 72</i>
